NB: For multiple species, please indicate on the key list supplied below	
Collection date:	Collection time:
Total number of samples:	
TESTING REQUIRED. – TICK RELEVANT BOX	
Please do not send payment – you will be sent an invoice upon completion of testing	
<input type="checkbox"/> Individual count (EPG).	<input type="checkbox"/> Express Test – Provides Positive / Negative Result Only – (No EPG)
<input type="checkbox"/> Pooled count (EPG).	<input type="checkbox"/> Larval Differentiation (8 - 10 Day Turnaround) <small>For Larval differentiation tests fill specimen container and do not refrigerate (Keep at room temperature)</small>

HOW TO COLLECT A SAMPLE:

- Put on clean gloves & collect a fresh sample (Wait until you see the animal defecate). Alternatively insert a lubricated fingers into the rectum, one finger at a time. No need to go very deep. Separate fingers and faecal matter will be naturally pushed forward.
- Collect enough fresh faecal matter to half fill the specimen container, seal, and place inside Ziplock bags and refrigerate.
- IMPORTANT: Label each individual sample container and list corresponding ID's below.**
